CHECK before uploading:

That layout measurements are correct to fit the system
That the colors are vivid enough to appear (over 30% CMYK)
That the resolution and picture quality are OK

NOTE:

TETRIX considers uploaded documents to fulfill requirements in accordance to these notes. No separate layout check is performed.

Alu Lite Infopole

- a) Connect the octagonal rods two-by-two, using the supplied threaded joints.
- b) Make sure that the grooves in the rods are aligned-otherwise the beams cannot be connected properly. Should the grooves not align, simply loosen one of the rods half a turn and tighten the other rod.
- c) Attach the round foot with the M10 bolt.
- d) Attach the end caps

Insert the keder of the printed canvas into the grooves in the beams.

Attach the beams to the rods using the torx key.

- Put the end of the rail into the groove of the rod and lock in place by turning the screw 180 degrees clockwise. To open, turn counter clockwise.
- Attach the brochure holders (optional)

Extra

- 1) Threaded pin for holding cell board signs
- 2) Spotlight
- 3) Cookie table
