

Showroom Flooring Systems

Clix is a high quality click-on module system for showroom floors. The modules are rapidly assembled and can be used over and over again. The Clix system can cover the entire floor area of a showroom or exhibition stand, or can be used to high-light certain products. The slim-line profile (only 8 mm) is extremely durable. It keeps the exhibition area fresh and tidy longer than conventional flooring systems and requires less cleaning.

Color: dark grey/black

EcoClix

EcoClix are made of 100% recycled materials and therefore offer excellent ecological value.

Color: blue, red, grey, black

ColorClix

ColorClix form a vivid and attractive floor. Make lines, mosaics, squares or figures. Giving you more freedom to bring out the company profile in colours.

Color: black

ErgoClix

ErgoClix give tired feet a break. The softer Clix are ideal for places where your feet do most of the work. An excellent system to be placed behind counters or on the entire exhibition stand.

Made in Finland

Using Clix makes your company and products stand out the way YOU choose them to. Smart.

One for every occasion

There is a smart way to fix every occasion with Clix. Choose EcoClix for ecological reasons, ColorClix to help your products get noticed and ErgoClix to find that extra comfort for your feet.

Just "clix" them together
You simply place the loop side under and "clix" on the next. Reverse the action if you need to move the floor from event to event.

The harder Color- and EcoClix can easily withstand heavy loads of e.g. a car or a fork lift.

Vivid ColorClix "synthetic rubber" modules

Always fresh, less cost

No need for expensive tiles, grinding, polishing or special surface treatments that wear out - with Clix your floors always look fresh. A solution that only takes a quick vacuuming for it to look tidy.

The Clix flooring is affordable and maintenance free. It is the smarter choice for any showroom.
