TETRIX offers flexible truss systems for displays and exhibition use. We make free 3D designs for you to help you choose the best solution. Our 4 way truss systems offer a wide range of possibilities and always look good.

The massive appearance might be misleading because the system is still light weight. A standard 15-20 m² construction may weigh as little as 50-80 kg in total. We always offer a warranty on our hard ware and you can be assured than by choosing a TETRIX system you have a display that will serve you well for years to come.

We also offer printed banners for our systems. Easy to use - quick to update.
