ROLL UP DESIGN

No BLEED and **no CROP** marks on the design. Our automated machines will fix everything.

Correct size
no bleed or
markings

+20cm

The design size is mentioned next to the product you choose. E.g, 80x200, 85x200, 100x200 and 120x200cm

You can ad +20cm of back ground under the design area, as this prevents a white strip showing in the opening of the Roll Up. This area rolls into the casette.

The safest way to send designs is as jpg files in **CMYK**.

If you know how to turn text to vectors you can also send as a pdf. CMYK and ISO profile.

Our printers can max 150dpi so to send in 300dpi is unnecessary.

Send files via our **UPLOAD**
